Professional Summary

Certified Data Engineer with 4+ years of experience building enterprise-scale ELT/ETL pipelines, lakehouse architectures, and cloud data platforms on AWS and Databricks. Dual Databricks-certified and AWS Certified Data Engineer, with expertise in Apache Spark performance tuning, DBT-driven transformation, Delta Lake, medallion architecture (Bronze/Silver/Gold), data quality, data lineage, and CI/CD for data pipelines.

Professional Experience

Accenture Solutions Pvt. Ltd.

Feb 2022 – Sept 2025

Data Engineer (AWS Data Pipeline)

Kolkata, India

- Designed and delivered 40+ production-grade ELT/ETL pipelines using AWS Glue, PySpark, S3, Redshift, and incremental data loads for enterprise data processing.
- Leveraged AWS Glue Data Catalog and S3-based data lake architecture to manage metadata and improve data discoverability across teams.
- Achieved 15% reduction in Apache Spark job runtime through targeted performance tuning, including partitioning, file format optimization, and executor memory configuration.
- Collaborated in Agile delivery teams using Jira and Apache Airflow orchestration to implement reusable pipeline patterns aligned with business requirements and SLAs.
- **Key Highlights:** Orchestrated 40+ production pipelines with Apache Airflow; managed TB-scale daily data processing across S3-Redshift infrastructure with enterprise SLA compliance.

Accenture Solutions Pvt. Ltd.

Sept 2025 – Present

Data Engineer (DBT & Databricks) — Enterprise Data Platform

Kolkata, India

- Designed and implemented a medallion architecture using DBT and Databricks across Bronze, Silver, and Gold layers, with Delta Lake-based storage for governed analytics.
- Built Bronze ingestion pipelines with PySpark and supported incremental data loads into Databricks Delta tables for downstream consumption.
- Created reusable DBT models with schema tests, singular tests, documentation, and explicit data lineage to improve data quality and traceability.
- Configured CI/CD for data pipelines using Git, GitHub Actions, and Apache Airflow to orchestrate end-to-end DBT model testing and deployment across environments.
- **Key Highlights:** Developed 300+ production DBT models across 12+ business domains; built Silver layer (STG, DIM Core, 100+ snapshots) and 100+ Gold views; supporting 8TB of governed data across 7+ analyst teams, with full Bronze-to-Gold refresh under 1.5-hour SLA.

Technical Proficiencies

Languages: Python, PySpark, Spark SQL, SQL

Cloud & Data Platforms: AWS (Glue, S3, Redshift, Glue Data Catalog), Databricks (Delta Lake, Unity Catalog), DBT

Architecture Patterns: Medallion Architecture (Bronze/Silver/Gold), Lakehouse, Data Lake, ELT/ETL, Incremental Data Loads

Big Data & Orchestration: Apache Spark, Airflow

DevOps & Quality: Git, GitHub Actions, Docker, Jira, CI/CD for Data Pipelines, Data Quality, Data Lineage

Databases & Tools: PostgreSQL, Redshift, Databricks Delta Tables, VS Code

Education

Pailan College of Management and Technology

2016 – 2020

Bachelor of Technology in Electronics and Communication Engineering

Kolkata, India

Certifications

Databricks Certified Data Engineer Professional

Issued: Nov 2025

🔗 [View Credential](#)

Databricks Certified Data Engineer Associate

Issued: Aug 2024

🔗 [View Credential](#)

AWS Certified Data Engineer – Associate

Issued: May 2026
